

WHY WE'RE HERE

Training, simplified.

We are the only collaborative fire & EMS training platform made 100% in Canada with Canadian firefighters in mind. FireEMS offers

not only a better way to manage your training, but also grants your department access to a network of local member departments.

FireEMS is:

COLLABORATIVE

FireEMS provides a database of courses that have been tested and improved by other departments. This means saving time on course development and access to high-quality, peer-reviewed content.

ACCESSIBLE

FireEMS was created by current training officers who needed a way to organize their content and saw an opportunity for cross-department collaboration. Our qualified on-demand tech support will help you design and navigate your new home base.

PERSONALIZED

After learning the ropes during your free trial period, members of our team are available for one-on-one consultation on how to maximize your department profile. Once you open a FireEMS account, you're in charge of how your content is organized, shared, and managed.

SAFE

All of our data is securely stored by AWS Canada. We will never share your department's content with other departments without your permission.

CREDIBLE

FireEMS courses are recognized as continuing education EMS courses by the Alberta College of Paramedics. We offer certificates and content developed by Alberta-certified Advanced Care Paramedics. Our platform is operated entirely in Canada, by firefighters.

MEMBERSHIP INCLUDES:

- Ability to organize + develop courses for your department
- Access to resources from other member departments
- Live chat on-call support
- Opportunity to gain continuing education credits recognized by Alberta College of Paramedics
- Track training and achievements on your department
- Access from any web-based device
